INEOS Oxide, a division of INEOS Americas, LLC, is pleased to continue its participation in the HPV Challenge Program by sponsoring *Oxirane, reaction products with ammonia, distn. residue, CAS Registry Number 68953-70-8*. We will provide a test plan and robust summaries of available test data, and, if necessary, begin additional testing by Dec 31, 2005 as part of a consortium with another manufacturer.

By sponsoring this chemical, INEOS Oxide is requesting that it be removed from the Priority Testing List in the 55th Interagency Testing Committee Report (70 FR 7364).

Dana Morisse-Arnold is the technical contact for this submission and can be reached at 979-415-8511.

Sincerely yours,

Erik Stewart

Subject: CBI letter for EPA for INEOS Oxide concerning CAS # 68953-70-8

INEOS Oxide, a division of INEOS Americas, LLC, produces a product called Alkanolamine 5503, which has an impurity. This impurity is known as *Oxirane, reaction products with ammonia, distn. residue, CAS Registry Number 68953-70-8*. In October of this year, INEOS sent a letter notifying EPA of INEOS intention to co sponsor a study of this impurity for HPV. The letter was marked as CBI (confidential business information). EPA has asked for a redacted letter. The original letter has been reviewed and there was no CBI in the original submission.

To this end, the original copy (unsigned) plus the company sanitized version (signed) has been included for EPA perusal. If this is not suitable or if more is needed, please contact: Dana Morisse-Arnold for this submission and can be reached at 979-415-8511.

Sincerely yours

Erik Stewart
